

Florian Bennhold is CEO of Symbior Solar and on a mission to support clients to transition towards low-carbon operations—improving profitability at the same time. Symbior is a solar PV and distributed energy developer focused on commercial and industrial clients as well as Asia's frontier solar PV markets. Symbior has delivered over 100MW solar projects and has a pipeline of over 600MW in Thailand, China, Philippines, Bangladesh, Malaysia and Indonesia. Before leading Symbior's solar operations, Florian was in charge of business development at Symbior Energy, the energy venture incubator. Prior to that he was a co-founder, business development executive and renewable energy consultant in the United States and Asia. Florian holds MS degrees in Engineering Sciences from TU Berlin and École Centrale Paris and an MBA from the Hong Kong University of Science and Technology. He lives with his wife and three sons in Bangkok.
