

Chris Oestereich is a circular economy consultant, writer, and university lecturer. He formerly led zero waste efforts for Albertsons and SuperValu, a nation-wide network of US grocery chains, where he

designed and implemented programs that diverted or avoided over 90% of the waste from over 200

grocery stores. He helps organizations rethink systems for financial and environmental benefits through

his firm, Linear to Circular. Chris is also a faculty member of the School of Global Studies at Thammasat

University, the publisher of the Wicked Problems Collaborative, an independent press that focuses on

humanity's biggest challenges, and a co-founder of the Circular Design Lab, an open innovation platform

that teaches community members to work on issues like waste and air pollution.
